

GRAVEL ACE

GRAVEL ACE

One Bike, One Life, Infinite Adventures!

DARE's newest generation of gravel bikes, Gravel Ace (GA) is officially here! Combining the geometry of competitive and all-round bikes, the GA offers a versatile and comfortable riding experience. With enhanced stiffness and power transfer, multiple build-in options for attaching accessories, and elegant design throughout, you won't need to choose between style and performance either.

Explore the world your way, on our all-new GA!

Be ready in no time for your next adventure!

With plenty of unbeatable features such as a spacious down tube bag and multiple mounting holes, Gravel Ace is the perfect choice for any of these adventures.

Bundle up your essentials and more on to the GA, and let's hit the road!

A New All-Terrain Experience

Is the straight and smooth asphalt becoming a bit stale? Other terrains are out there waiting for you to explore! The Gravel Ace's specially designed geometry and 50C tires make for a comfortable ride even over bumpy trails, and its 24-degree flared handlebars are a breeze to maneuver.

Let the GA's perfect balance of stiffness and agility persuade you to take the roads less traveled.

COLORS

Barley White

Standard Color

Inspired by flowing fields of barley under the summer sun, this warm color recalls the awe-inspiring feeling of being immersed in nature's vastness.

Forest Green

Special Color

A bright green that gradually turns to forest green further down the frame, patterned with hexagons giving the effect of scattered light, mimicking sunshine filtering through treetops and flickering onto a dark forest floor, waiting to light your journey ahead.

Dragon White

Limited Color

2024 is the Chinese lunar calendar's Year of the Dragon, and commemorating this occasion is the majestic Dragon White. This color features a shimmering green blending into snowy white along a pattern of hexagons, a portrayal of dragon scales weaving between verdant forests and billowing clouds.

FEATURES

All-Terrain Geometry

Our meticulously calculated design for the GA aims to combine competition and adventure. Compared to the GFX, it has a similar stack with a longer reach for added aggression, yet maintains a more relaxed position than most brands. The adjustable stem allows for customizable reach. The GA's wider wheelbase enhances off-road performance and stability. We offer sizes starting at 156 cm, with geometry scaled linearly.

Elevated Performance

GA features upgrades to the three essentials of gravel riding: stiffness, comfort, and versatility, surpassing the performance of GFX by 8 to 10 percent!

New Flared Handlebars: G:H1 & G:C1

We've designed two new handlebars just for the Gravel Ace, the lightweight G:H1 and integrated G:C1. Both have a 24° flare, and increased 5° backsweep and 6° outsweep, providing better grip and maneuverability. We've also added a 46cm size option, a width that gives even more control over off-road terrain.

G:H1 Lightweight

Built with MS-HMC carbon fibers an internal cable hole, G:H1 has a 24° flare, and increased 5° backsweep and 6° outswEEP, providing better grip and maneuverability.

Reach: 76mm | Drop: 100mm

Size: 400/420/440/460mm

Weight: 225±10g (400mm)

G:C1 Integrated

G:C1 has a 24° flare, and increased 5° backsweep and 6° outswEEP, providing better grip and maneuverability. Built-in mounting holes for Shimano's newest satellite shifter tops (SW-RS801-T).

Reach: 76mm | Drop: 100mm

Size: 80x400 / 90x400 / 90x420 / 90x440 / 90x460 / 105x400 /

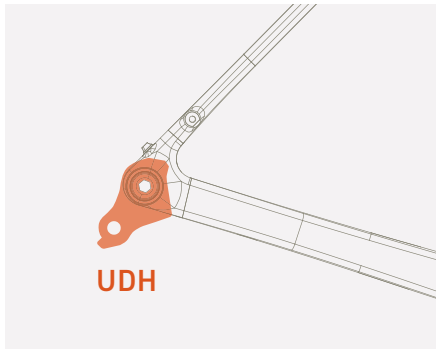

105x420 / 105x440 / 105x460 mm

Weight: 350±10g (400-105mm)

SRAM UDH Hanger

GA is formulated to fit the popular MTB derailleur hanger standard UDH, which can be directly installed with SRAM's GX series, offering better shifting performance and protecting your derailleur in the event of impact.

Affix Anywhere

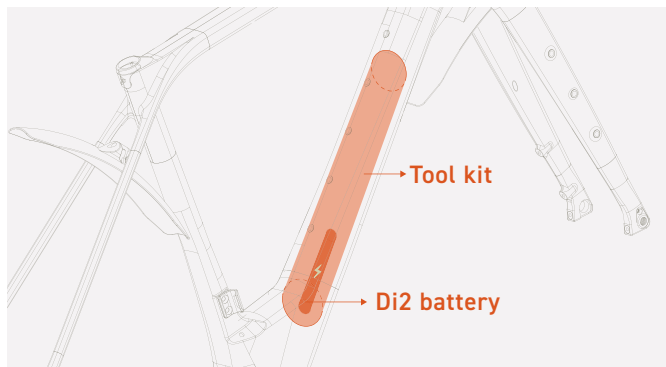

From the top tube all the way to the down tube and fork, we've added plenty of built in mounting holes for securing bags and other accessories. With the GA, simply attach and go!

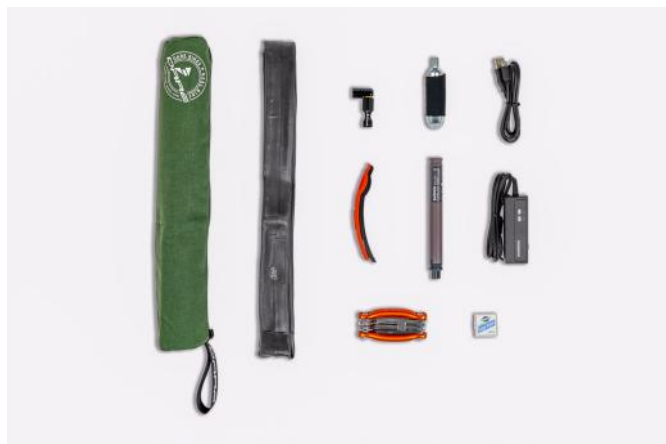

Di2-Integrated Toolbag

GA is equipped with an extra large toolbag that can hold two inner tubes along with other supplies, and cleverly includes a dedicated slot for a Di2 battery as well.

As gravel cycling trends towards wider tires such as the 50C, an increasingly robust supply kit is also recommended to have on hand. That's why we've designed this extra-large (Φ5x38cm) bag to accommodate all your supplies plus a Di2 battery, all neatly stored on the down tube.

Off-Roading Mudguards

Wet terrain and rainy weather can't stop the GA with its specially designed front and rear mudguards.

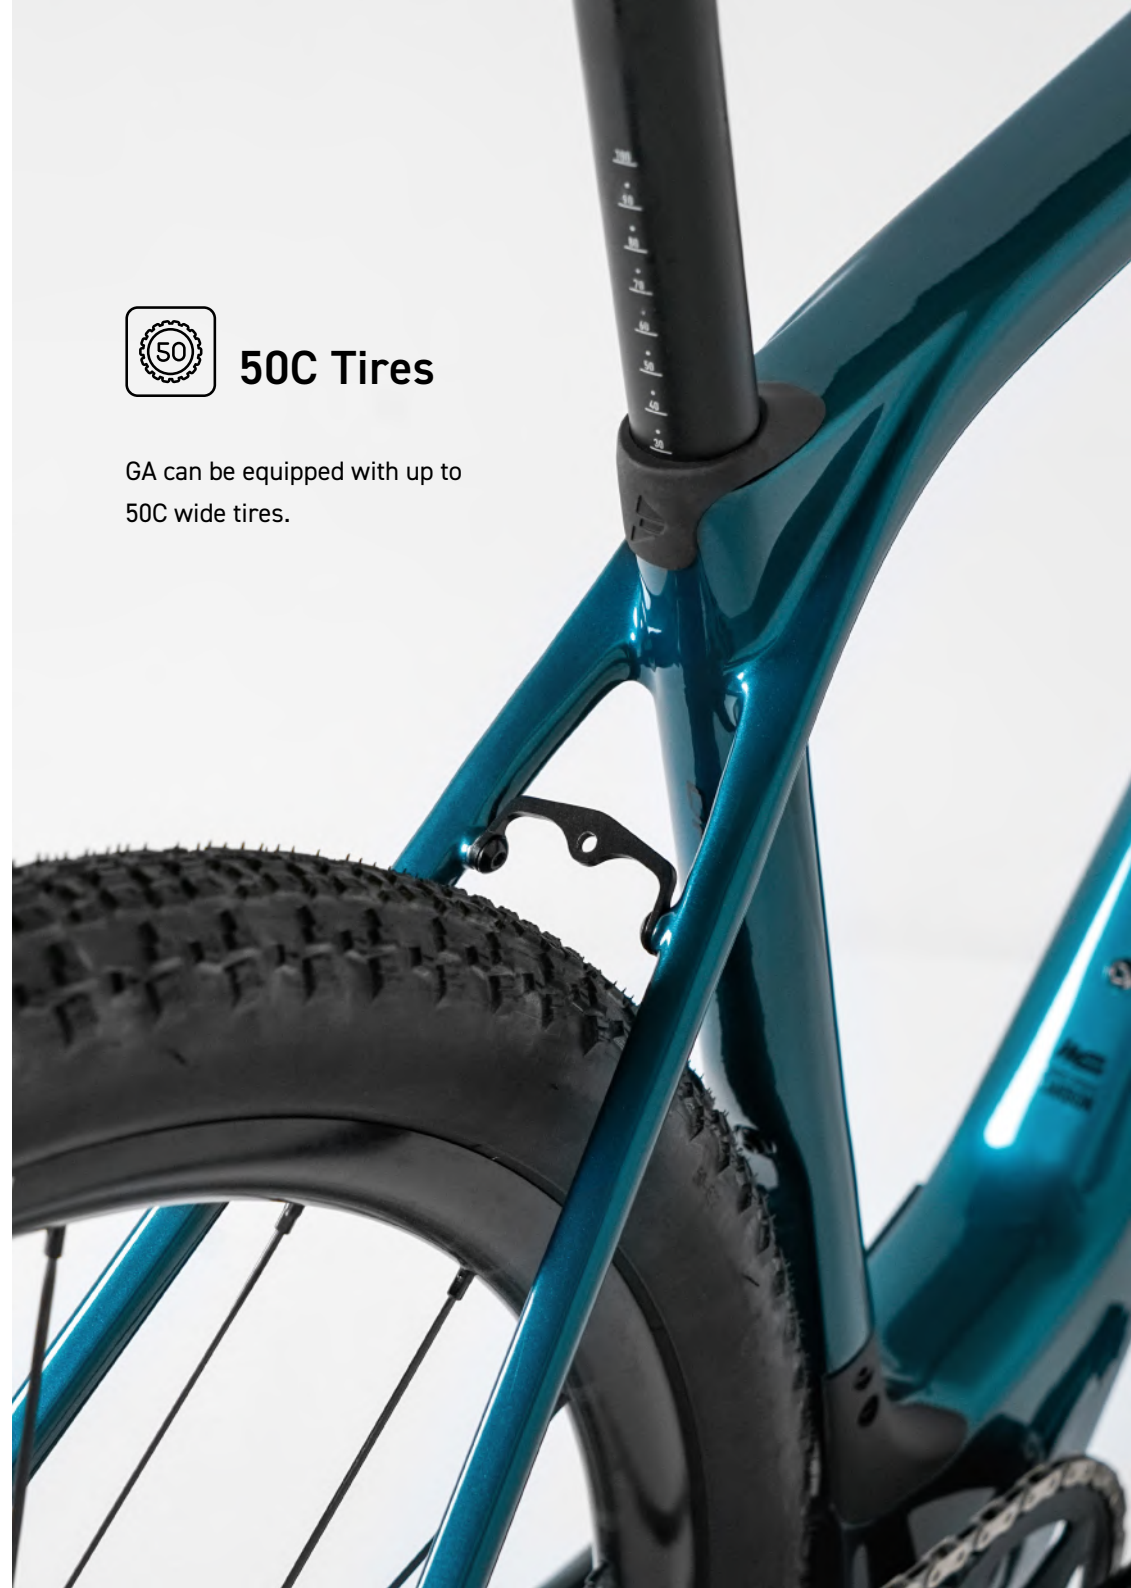

Sleek Single-Chainring Design

A sleek custom front derailleur cover is available for purchase to neatly cover the exposed front derailleur mounting holes when a 1x12 speed crankset is installed.

50C Tires

GA can be equipped with up to 50C wide tires.
